SPECIALIZED ■ WATSON ■ ASSESSMENT ■ TEAM

4 STEP PROCESS

1. ASSESS

- What gloves are currently being used?
- What is the injury rate and the cost of these injuries to the employer and employee in lost workdays, efficiency, etc?

2. ONSITE AUDIT

- Assess your operations and examine glove usage throughout the facilities to determine potential opportunities for improvement
- S.W.A.T. members interview management and key employees to determine glove usage, job responsibilities and training.

3. EVALUATE & CONSOLIDATE

- It is important to properly fit workers with gloves that are correct for the specific jobs, prevent injuries, while maintaining the highest quality in the work place.
- Written recommendations on how to reduce injuries, consumption and costs as well as how to consolidate your current glove offering will be presented to you in a professional report.

4. FOLLOW-UP

- After the S.W.A.T program is implemented, we will continuously follow-up with you to ensure our recommendations are successful and make continuous improvements to the program.
