

Winters TEMPERATURE CHART

LEVEL	MILD				MODERATE				EXTREME	
RANGE	TEMPERATURE RANGE : 0 to -5 DEGREE CELSIUS				TEMPERATURE RANGE : -5 to -15 DEGREE CELSIUS				TEMPERATURE RANGE : -15 to -20 DEGREE CELSIUS	
LINING TYPES	NAPPED THERMAL INTERIOR	COTTON FLEECE TR2 HEAT LOK	FOAM	7GG THERMAL ACRYLIC TERRY LINER	C40 THINSULATE	SHERPA	C100-C150, G100 THINSULATE	COLD MX™	C200-C300 THINSULATE	
PHOTO OF LINING										
COATING DESCRIPTION/ FEATURES	Minimum warmth. The fibres of seamless string-knit shells are brushed to create a warm lining	Minimum warmth. A lightweight 100% cotton, combed to provide insulation and excellent dexterity	Medium warmth. A polyurethane foam layer, sometimes covered by fleece or lined with nylon	Minimum warmth. A regular cotton, wool or polyester fabric that is coated on one side with acrylic foam	Medium warmth. Designed by 3M, Thinsulate™ fibres are fine, making them ideal for trapping insulating air and reflecting back the body's radiant heat. Thinsulate™ insulation provides more warmth with less bulk.	Excellent warmth. A nubby, soft pile material that provides a high degree of warmth. The sherpa material is often made from a blend of fibres including acrylic and polyester.	Excellent warmth. Designed by 3M, Thinsulate™ fibres are fine, making them ideal for trapping insulating air and reflecting back the body's radiant heat. Thinsulate™ insulation provides more warmth with less bulk.	Thin and dense fiber thermal insulation for great dexterity which offers wind/water resistant, thermal protection, and antibacterial properties.	Extreme warmth. Designed by 3M Thinsulate™ fibres are fine, making them ideal for trapping insulating air and reflecting back the body's radiant heat. Thinsulate™ insulation provides more warmth with less bulk.
